

Our Approach

We work with infants 0-12 months and individuals up to 18 years old.

We approach therapy with a team based mindset using co-treatment, back to back treatments and collaboration with other therapies.

We value family involvement in all aspects of therapy and will work with you regardless of your ability to pay.

NorthLakes
COMMUNITY CLINIC

Pediatric Occupational Therapy

We work with individuals to gain independence and promote the development of skills needed to function and socialize in home, school, and community environments.

Occupational Therapy can help with:

- Sleep issues
- Picky eating
- Attention challenges
- Learning disabilities
- Bowel and bladder control
- Balance challenges
- Challenges with motor skills
- Sensory processing challenges
- Aggressive and controlling behaviors
- And other challenges and needs*

Pediatric Speech Therapy

We work with individuals to support the communication growth needed for optimal interaction and socialization. We also work with cognitive disorders, swallowing dysfunction, and eating difficulties.

Speech Therapy can help with:

- Apraxia
- Learning disabilities
- Challenges with social skills
- Speech or articulation challenges
- Auditory processing challenges
- Language processing challenges
- Alternate communication needs
- Challenges with executive function
- Feeding and swallowing challenges
- And other challenges and needs*

Our lending closet is available for families to take therapy equipment home allowing at-home programming and the ability to trial equipment before purchasing.

"It's so fulfilling to see the pediatric population become more independent and successful with daily occupations through the work we do."

Angie Schoeppach
Occupational Therapist
Ashland & Hayward

"I love helping each child to find and use their voice and communicate as effectively as possible. NorthLakes provides a great space for us to dynamically work and use a whole-body approach to treatment."

Jennie Zelenak
Speech Therapist
Ashland

"I love what I do because I get to help my patients improve their daily lives in a variety of ways while having fun."
